

DRUG DETECTION AEROSOLS

Mistral Security's DRUG AEROSOLS are unique presumptive field tests. Like all Mistral presumptive drug tests, the drug aerosols can identify most illicit drug substances AND the aerosols can detect trace residues (which the naked eye cannot see) on surfaces or objects. Aerosol drug tests are ideal as an investigatory tool where trace evidence is important or perhaps critical to justifying a search, or seizure, or warrant.

- Drug aerosols come in 50 and 100 test sizes, as Kits or individually
- Fastest drug test and highly accurate
- Sensitivity at the microgram level or lower
- Cost per test is much less than single test products
- Aerosols do not destroy evidence

SWIPE – SPRAY – READ

APPLICATIONS

- Narcotic units
- Street/Highway Patrols
- K-9 Units
- Military CID/Provost Units
- Company HR Departments
- Schools
- Corrections and Community Corrections
